CEMS Club Prague
VŠE Office 553
Náměstí W. Churchilla 4
130 67 - Praha 3

Dear CEMS Community,

I am writing this letter to express my interest in becoming the CEMS Club Prague President. I come from an international background with a great passion for travelling and a strong interest in exploring new cultures. My area of focus and interest varies from innovation and technology to project management. I have successfully accomplished a three year study programme in two years while working and establishing my own project. This busy period of my life has improved my time management skills, work ethic and helped me increase my productivity. As co-founder I launched events in cooperation with CzechCrunch. To this day I am involved in this project, I create content and manage events. Moreover, my work experiences helped me fully understand the importance of being responsible and having great team dynamics in today's multi-disciplinary business environment. Since the CEMS Club is the perfect opportunity to further develop the skills of all the team members, I have taken great care in selecting a team that I believe will collaborate and grow well together. I believe my academic background, business knowledge and previous experiences have provided me with the credentials needed to thrive as the next CEMS Club Prague President.

CEMS Club Prague has always been very successful among the Alliance Clubs, winning the club of the year award three times in the past. The balance between corporate and social events, organised in the previous years, has truly been outstanding. The community of Prague has continuously extended a warm welcome to all the international students and I will ensure the continuation of this legacy and even take it a step further. My vision, for the next CEMS Prague year, is to streamline all processes by combining effectiveness with competitiveness. I want students to always be well informed about all the aspects of their CEMS experience by, for example, offering event registrations and payments online. In order to realise my vision, I will create a detailed programme and strategy by integrating the best practices of all top CEMS Clubs worldwide. My aim is to fully leverage from international exposure of all the other team members as well as from my own.

When I think about CEMS, the words that always come to mind are Community, Extracurricular, Motivation & Synthesis. The CEMS Community is unique among the various student organisations. It provides a close knit and familiar environment where the focus is not only on events but also emphasises the development of general skills. With an extensive international network it enables the constant widening of horizons, during the CEMS study years and also for the rest of the student's life thereafter. This makes CEMS a gateway to prestigious international careers. Since hard skills are the building blocks of these careers all partner schools lay the foundations. Being successful, however, requires building a soft skills structure on our hard skills foundations. Together, we can develop our soft skills and build our structures that will form us into truly global and internationally-minded business individuals. In the end, what sets us apart is our motivation not only as individuals but as individuals of a global community. We are continuously motivating ourselves as well as those around us to achieve more and constantly develop further, such that when we grow individually, we also grow as a community. My team and I will do our best to ensure the growth of the CEMS community in Prague and ensure that your CEMS experience is both valuable and unforgettable.

Feel free to approach me at any time, I am open to new ideas and any feedback is much appreciated. Please do not hesitate to contact me if you have any questions or suggestions.

Sincerely yours,

Natalie Badie
